## Outcomes Assessment Tools

This class will discuss the importance of using outcomes assessment tools to document the extent of injuries and patient progress

This course will cover:

- **General Questionnaires:** This section will focus on the more commonly used questionnaires that are most helpful in understanding a new patient's injuries and how they have been affected by them.
- **Spinal Questionnaires:** Since most motor vehicle injuries include spinal trauma this section will again address the questionnaires and individual questions. Attention will also be given to scoring these and what changes in those scores mean to the practitioner.
- **Extremity Questionnaires:** This section will focus on extremity tools again emphasizing how to score each and how to interpret the scores.
- **Concussion Questionnaires:** These vary from most others so this section will focus on those differences along with what the findings mean to diagnosing, treating, and determining the need for referral.

## Registration Information

Tuition is \$300 and includes the two hours of documentation needed to renew your license in 2020.

**For members of the  
Arizona Chiropractic Society  
this is a free class.**

If you are not a member and would like to take advantage you can join the ACS now at: <https://azchiropractors.org/pages/Member-Signup.php>

**ACS membership is \$50/month**

This class has been approved for up to 15 CEs by the Arizona Board of Chiropractic Examiners #AZCE16063 but we will be offering 12 hours in one day

The [American Academy of Motor Vehicle Injuries](#) was created to better prepare doctors and lawyers who work with personal injury cases.
